
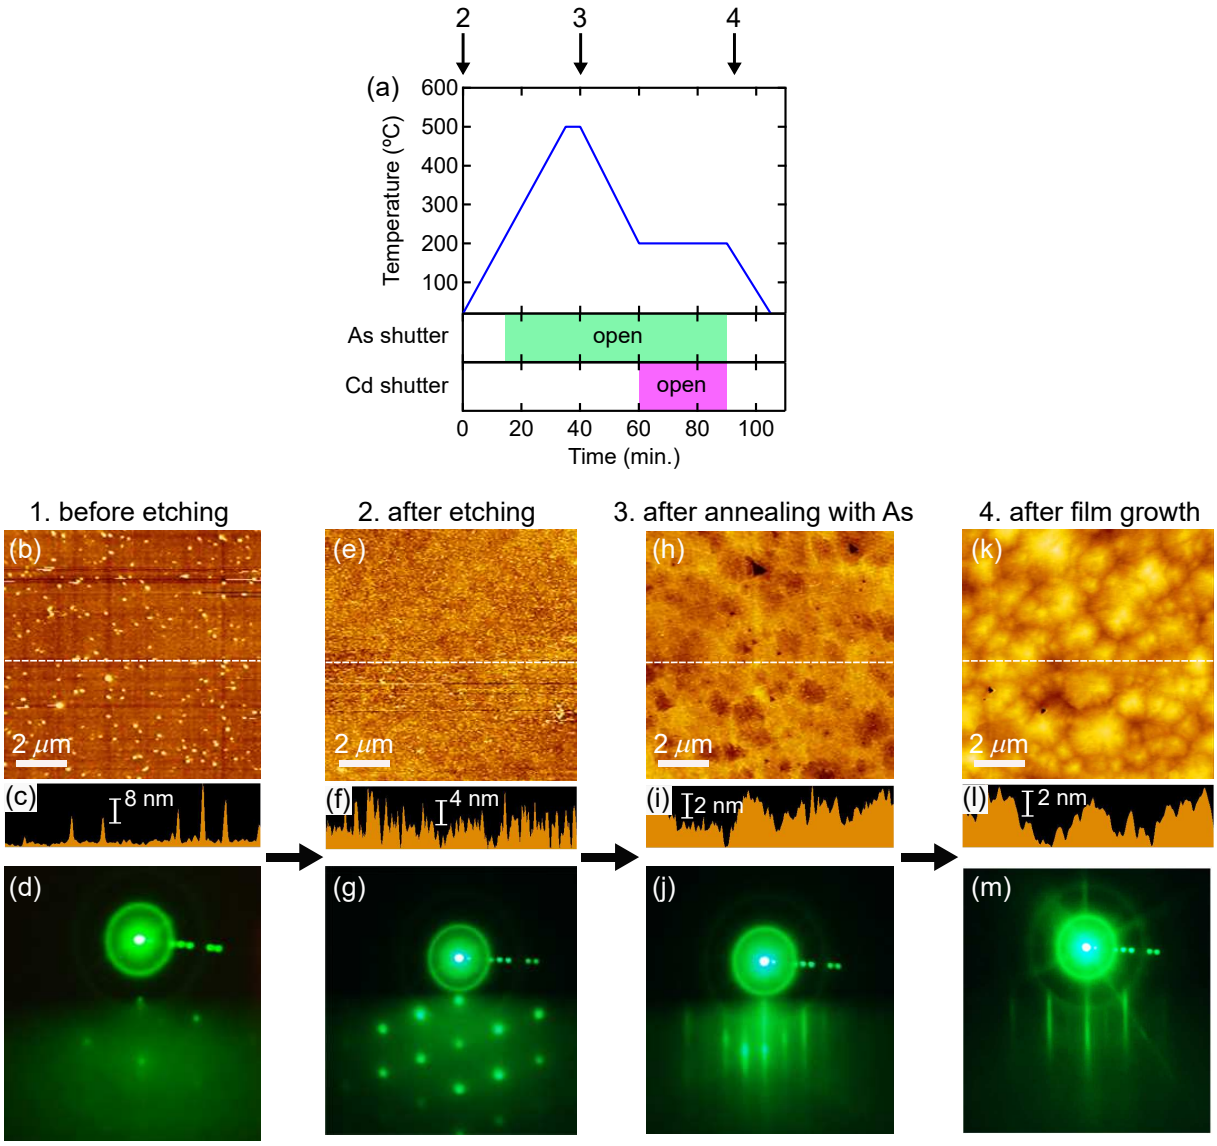

FIG. S3. (a) Sequence of the Cd_3As_2 film growth. (b)-(m) AFM images, thickness profiles along the broken line, and RHEED patterns taken at representative stages indicated in (a). ((b)-(d) before the Br_2-methanol etching (e)-(g) after the Br_2-methanol etching (h)-(j) after annealing at 500 °C with supplying As_4 flux (k)-(m) after the film growth).
